PROFESSIONAL SUMMARY

Aspiring data analyst pursuing a master's degree in computer science with a Management Information Systems background. Hands-on experience in SQL, Python, and BI tools and skilled in data analysis, visualization, and translating raw data into actionable insights and recommendations. Proven data analyst experience through my internship with Burlington Stores, where sales data analysis directly informed forecasting and planning decisions. Seeking a data analyst role to apply these skills to drive measurable and meaningful business impact.

EDUCATION

University of Pennsylvania, School of Engineering and Applied Science	Philadelphia, PA
Master of Applied Science in Computer Science, Concentration in Artificial Intelligence	Expected December 2026
Courses: Big Data Analytics, Machine Learning for Data Science, Data Structures & Software Design	GPA: 3.00

The Pennsylvania State University, Smeal College of Business	University Park, PA
Bachelor of Science in Management Information Systems, Minor in Information Sciences & Technology	December 2024
Courses: Business Analytics, Data Management, Business Intelligence, Enterprise Information Systems	GPA: 3.94

SKILLS

Languages: SQL, Java, Python

Analytical Tools: Microsoft Access, Tableau, RapidMiner, Excel

Data Tools: PySpark, Pandas, Scikit-Learn, Jupyter Notebook

Platforms: MySQL, AWS, PyCharm, SAP, Docker

TECHNICAL PROJECTS

Global Health & Life Expectancy Analysis – *Python, Pandas, Scikit-Learn, Matplotlib, Google Colab*

- Prepared a global health dataset spanning 190+ countries and applied K-Means and PCA to identify 4 distinct groupings
- Developed and evaluated 4 regression models, including OLS, Ridge, Lasso, and Elastic Net, to predict life expectancy
- Analyzed model coefficients, multicollinearity, and performance metrics to identify key predictors and evaluate model fit
- Translated regression findings into interpretable insights on relevant drivers of life expectancy across regions

Relational Hospital Database Development – *SQL, MySQL*

- Designed a comprehensive Entity-Relationship Diagram (ERD) modeling 12+ relationships within a hospital
- Built normalized SQL tables for each core entity to support efficient data retrieval
- Enforced relational constraints to perform 25+ complex, multi-table queries and maintain data integrity

Technical News Search Engine – *Java, Eclipse*

- Processed a 100-article dataset using a custom tokenization program that matched words to articles with 95% accuracy
- Implemented 9 analytical features, including trending topics and date-range filtering, to gain insights across the dataset
- Designed a user-friendly menu supporting 2 distinct search and input modes for flexible dataset queries

Business Development Proposal – *Tableau*

- Interpreted restaurant data from the Yelp Open Dataset, examining attributes to identify drivers of customer satisfaction
- Created 8 Tableau visualizations, including 2 geographic maps, comparing star ratings and review volume across states
- Integrated findings into a data-driven proposal for an optimal restaurant, location, and amenities, targeting a 4.8-star rating

WORK EXPERIENCE

Planning & Allocation Analyst Intern	Burlington, NJ
<i>Burlington Stores, Inc</i>	June 2024 - August 2024

- Partnered with cross-functional business teams to analyze quantitative sales data using Power BI
- Identified trends across ladies' jewelry products and delivered data-driven recommendations to support planning decisions
- Analyzed historical sales data to improve demand forecasting and planning processes for hats, scarves, and ruanas
- Evaluated sales performance across 200+ stores, uncovering a +4.9% variance in handbag sales to present to management

SQL & Database Learning Assistant	State College, PA
<i>Penn State College of Information Sciences & Technology</i>	August 2022 - December 2024

- Tutored and graded assignments for 85+ students per semester in SQL, database design, and query optimization
- Led weekly office hours supporting students with SQL query development, database analysis, and problem-solving
- Assessed assignment effectiveness for 14 weeks of labs and tests, providing feedback to improve class structure
